

# Special issue of *Nanotechnology*

## GUIDELINES FOR AUTHORS

Many thanks for agreeing to contribute an article for the special issue in *Nanotechnology* featuring papers from the 'Nano and Giga Challenges for Electronics, Photonics and Renewable Energies' meeting. We anticipate receiving original research papers of approximately 5-8 journal pages (allowing approximately 900 words per page). This length is for guidance only; if your article is longer, we will be happy to consider it.

**Electronic files of all manuscripts together with Article Submission Form must reach IOPP by September 16, 2011.**

### How to submit

Our preferred method of submission is through the web. Please go to <http://authors.iop.org/>. From this page you should do one of the following:

- **Authors with a personal IOPP author homepage**  
From the authors.iop.org web page you should select 'login' and submit your article in the normal way. Authors with a personal IOPP homepage can, if they wish, speed up the reviewing procedure by choosing to build their own PDF online as part of the submission process.
- **Authors without a personal IOPP author homepage**  
From the authors.iop.org web page you should select the 'Submit an article' link which will guide you through our submission process. This procedure will send your files to our Electronic Submissions team who will process your files and forward them to *Nanotechnology*. Once this is done, a personal homepage will be set up for you, providing access to extra services. Details will be supplied in an e-mail.

**All authors please note: When filling in the submission web form under 'Article Type' please select 'Special Issue'. In the dropdown box that appears following this selection, please choose 'Nano and Giga'.**

The full information on how to prepare your article for submission can be found on <http://authors.iop.org/> 'Guidelines for Authors' link on the left.

### Contact information for electronic submissions:

If you have any queries, questions or suggestions about electronic submissions, then please contact our Electronic Submissions team on [esubs@iop.org](mailto:esubs@iop.org). **Contact Details for**
